R Panel

MORE than just roofing

The R Panel (other names include Trapezoidal panel, New Wave, Semi-Industrial etc.) is our most affordable and efficient panel. Like its 'cousin,' the series 2000 Standing Seam Panel, the R Panel is ideally suited for a wide range of roof types and applications. Its comparative low cost, efficiency and ease of installation make it our most popular product. Traditional use for this panel has been mostly on factory type buildings, but over the years this has evolved into steep roof applications, siding (cladding) and soffit panels.

This panel can be roll formed in continuous lengths up to approximately 50 feet (limited by length of truck). It is also a structural panel that can span over open framing without the need for continuous deck support. Roof Systems R Panel meets the most stringent building codes and can even be installed over existing roofing materials.

HEAD OFFICE:
Lot #62, Frederick Settlement
Industrial Estate, Caroni.
